Making Changes

Update Content

Edit the page files in `client/src/pages/` to update content, text, and descriptions.

Update Styling

- Global styles: `client/src/index.css`
- Component styles: Use Tailwind classes in component files
- Dark theme colors: Update hex values in `Navigation.tsx` and `Footer.tsx`

Add New Pages

1. Create a new file in `client/src/pages/NewPage.tsx`

2. Add route in `client/src/App.tsx`
3. Add navigation link in `client/src/components/Navigation.tsx`

Update Logo

Replace the image URL in:

- `client/src/components/Navigation.tsx` (line 25)
- `client/src/components/Footer.tsx` (line 13)

Build & Deploy

Build for production

Bash

```
pnpm build
```

Preview production build

Bash

```
pnpm preview
```
